

INTERNATIONAL SEMINAR ON BIOSEPARATION

Application and Characterization of Chromatographic Monoliths for pDNA and Virus Purification

Prof. Dr.
Aleš PODGORNIK
University of Ljubljana
(SLOVENIA)

2023年12月5日

14:30 - 16:00 (14:00 開場)

ワイエムシイ 京都研究所
(市営地下鉄国際会館駅 徒歩5分)

Biography of Dr. Podgornik:

Aleš Podgornik, Ph.D., is by profession chemical engineer and has worked for 25 years in the field of biochemical engineering, especially in the downstream processing of macromolecules. He worked as CSO and R&D head for companies BIA and BIA Separations for more than a decade, currently he holds a position of professor of Chemical engineering and professor of Biotechnology on Faculty of Chemistry and Chemical Technology, University of Ljubljana. His research interest is biochromatography related to development and application of monolithic chromatographic stationary phases, bacteria bacteriophage interactions and synthesis of plasmonic nanoparticles. He published over 100 papers, 10 book chapters and holds several national and international patents.

主催：京都工芸繊維大学 後援：株式会社 ワイエムシイ

世話人：分子化学系准教授 熊田陽一 (kumada@kit.ac.jp)
